# Account Logon

- Insert your account name (usually your email address before the @) and your password.
- Check this if you need SPA.

Internet Connection Wizard

Internet Mail Logon

Type the account name and password your Internet service provider has given you.

Account name: whateverwerks

Password: ●●●●●●

Remember password

If your Internet service provider requires you to use Secure Password Authentication (SPA) to access your mail account, select the 'Log On Using Secure Password Authentication (SPA)' check box.

Log on using Secure Password Authentication (SPA)

< Back   Next >   Cancel

# About SPA

## SPA – Secure Password Authentication

Some email clients require that you enable logging on using Secure Password Authentication. Check with your email program to determine if it is needed. If you can receive mail, but not send it, this could be your problem.

We know that MSN, Earthlink, PeoplePC, NetZero and MyExcel require SPA.

# Thank You
